Mindquest Academy is a measure of online college prep courses that can be flogged to fit needs and interests of adult learners.

Mindquest Academy curriculum works best with students taking a TABE Reading form D, 7th grade level and higher. The academic semester courses are self-paced, and the diploma level includes a blended learning environment and a fully DL environment. The learner needs to have solid reading and study skills. Successful students are very focused and motivated. Helps our program meet the needs of learners who want to complete their high school diploma. Because it has multiple subjects and it is standards-based, it gives our students the best chance of success.

Students do need to be independent learners to be successful.

Counseling and testing hours must be managed and recorded by audit purposes. For those using the online version of the program, all lesson units must be completed through the learner account should be recorded as evidence of student unit completion.

Regular testing is important to capture the learner's growth. CASAS reading and CASAS literacy tests are recommended.

EASY ESL is a 12 unit series (DVD and online) that presents language, culture and a fully DL environment. It works best with some f2f support present for easy communication between instructor and learner, as well as providing instruction opportunities to give feedback and encouragement to learners.

Lessons are text dense and challenging, especially for learners who struggle with both cultural and moral issues. The series lacks opportunities for learners to practice or improve their speaking and writing skills. The content is starting to become dated (there's a whole episode that deals with getting a landline installed and paying the bill in person).

Proxy hours are earned by teacher instructors for the time students are satisfactorily completing each task. Counseling and testing hours are recorded, as well. Written records of student unit completion, counseling, and testing hours must be maintained and recorded for audit purposes. For those using the online version of the program, all lesson units must be completed through the learner account should be recorded as evidence of student unit completion.

My Foundations Lab is an online learning platform that creates a customized learning path for each learner based on his or her ACCUPLACER Diagnostic test results. Teachers, learners, English learners, and learning managers can work together to plan a learning path intended to prepare learners to take the ACCUPLACER college placement exam.

Novolet provides subject matter in core areas such as math, science, social studies, English, health, and school to work. It is an online tool.

Putting English to Work is an online program with lessons across a wide content area, including math, science, social studies, English, health, and school to work. It is an online tool.

Rosetta Stone provides online language instruction that develops functional fluency, using the Dynamic Immersion method to teach English Language. Learners with differing learning styles—visual, auditory, kinesthetic, etc.—who are working to achieve self-sufficiency through improved command of target language skills, including vocabulary, sentence construction, and listening and speaking skills, can use a program that can be used anywhere—home, in class, or at work.

Skills Tutor is an online program with lessons across a wide content area, including math, science, social studies, English, health, and school to work. It is an online tool.

Teach Me English in ASL focuses on teaching American Sign Language, silences, and vocabulary while using American Sign Language.

USA Learns is a public, free website that has three different level courses with different content for ELLs.
